September 24th Chapter Meeting Connecting in the Interrogation Process

Occasionally we all have to gather new information. It could be from an incident, about another company, or even in preparation for a new project. Unfortunately, our success often hinges on asking the right questions to prevent overlooking key information upon which our successful endeavor may be dependant.

Our topic for our September Chapter Meeting will be presented by Dale Reeves, CFI (Certified Forensic Interviewer). A CFI is a board certified professional from the International Association of Interviewers with the expertise to conduct a variety of investigative interviews with victims, witnesses, suspects or other sources to determine the facts regarding suspicions, allegations or specific incidents in either public or private sector settings.

[REGISTER NOW](#)

This is a continuation of our Emergency Preparedness series as we continue to learn to prepare for critical incidents. Our goal for September is to help learn what questions to ask and to be gain insight into how to identify when there is more information to be ascertained during our investigative processes.
(1 CPE credit hour)

[We will be meeting at Intermountain Lock & Security Supply at 11:30 A.M.](#)

August 27th Chapter meeting had a great turnout of 55 participants at the Living Planet Aquarium. It was an exciting event with a great presentation on the use of the Department of Homeland Security's CBAT system for site assessments.

Thanks again to Ralph Ley of DHS for a great presentation, to Peak Security for getting us into such a fantastic venue, and to Dawn Gregory our ASIS International RVP for flying in from Colorado to join us.

THANK YOU TO OUR SPONSORS
